Div. of Oil, Gas & Mining

Hi Wayne

We have correctly rehabilitated the core holes as per instruction citation # MC-2016-42-02 S/017/0002 dated 03/07/2016. The hole's were dry and our consulting geologist will submit a letter to this affect.

I have removed all the core drills off the mountain and will only resume once we have submitted exploration plan and receive approval on the drill sites. The area has not been rehabilitated due to ice and snow. Once the weather clears we will have this cleared and photographs will be submitted. I will bring a check with me to DOGM 04/07/2016 for the bond. I apologize for our actions and consult with the department before commencing with any other work.

Thank you,
Shane Scott
Bromide mining.
